commit 287e95bb43d813bdf459532f85dbba7623bb2c8c (HEAD -> master, heroku/master, heroku/HEAD)
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Sat Apr 17 20:13:55 2021 +0100

    Added res.send() at end of /logout callback - was getting a request timeout error (I assume due to not sending a response)

commit 912c753783d2a1438bfde7f848380803a8922172
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Fri Apr 16 16:24:02 2021 +0100

    /logout route now calls req.logout() followed by req.session.destroy(), which I hope should be all that it needs to do...

commit e287b9d66c5537e3db573f51d8a2202b0295eea9
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Wed Apr 14 15:51:40 2021 +0100

    Commented out session & user logging middleware (src/app.js lines 102-106)) which was used for development purposes only, for checking session and user objects passed to Passportjs authentication methods. May be useful again before final deployment

commit 71c98aac55c17b5ada42b2974daa22de54c23947
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Wed Apr 14 12:28:35 2021 +0100

    Implemented Passport isAuth middleware to protect all routes except getlanguages, translate, unauthenticated, login & register

commit 1a50c6d709ae9b99da3f753d9a842b9d892af418
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Wed Apr 14 12:20:16 2021 +0100

    Fixed typo in '/unauthenticated' route name (was missing the t), caused redirection to fail

commit cf3edab56ac91a3a81b445dd1c09cc115c68c35d
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Wed Apr 14 12:16:31 2021 +0100

    Testing route protecting using Passportjs authentication

commit 81829493313e962009bb7a121df8dbe5c4f86cdb
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Wed Apr 14 11:57:07 2021 +0100

    Comments for clarity

commit a672d77fc58ac74227ea96d34e7454be08e05f71b
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Wed Apr 14 11:54:31 2021 +0100

    Removed unnecessary username validation from verifyCallback function in config/passport.js. We don't use passport.authenticate('local', verifyCallback) in the login or registration routes - only in routes which should be prohibited to unauthenticated users (requests, conversations, messages, any routes using delete requests). Hence, the verifyCallback function will only be checking usernames & passwords from the session store, not from user input (checked by our own logic in login & register routes)

commit 8a591a8dbba7550e5da33aa06734b6f4ae19163f
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Tue Apr 13 20:46:41 2021 +0100

    Code tidy up in src/routes/main.js - removed unnecessary property setting in session object in login & registration success. Properties were redundant now that we have Passport auth

commit 84671770c594012f3caf1545087c676fce724b6
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Tue Apr 13 20:39:37 2021 +0100

    Fixed bug in the req.login call (creating login session on server) on successful registration of a new account

commit 6cda1a6b8d45bfc3d687f4eb88fc448bbce8b644
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Tue Apr 13 20:26:42 2021 +0100

    Now testing using req.login to create Passport session on successful registration of a new user

commit 1356c29ba6fd38071c9a56bec5eb3921afc50071
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Tue Apr 13 20:13:38 2021 +0100

    All appears to be functioning correctly in login route now - only using Passport for req.login after my own custom auth logic has succeeded

commit 1cbf1ec2e9f113408fa6ca45317f327d8d0ea675
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Tue Apr 13 19:57:18 2021 +0100

    Debugging login flow with Passportjs (now not bothering with passport.authenticate as middleware in login routing, too COMPLICATED trying to handle failure reasons & return the according messages to frontend)

commit 7f8ef1a6ee9b2efedd29afd996e3088c766c0223
Author: Ed Bradbury <edrad085@gold.ac.uk>
Date: Tue Apr 13 19:16:17 2021 +0100

    Never ending debugging of Passportjs auth

Testing changes to login process using Passport.js authentication

commit c0b9f6a3ed1fa1e16aed636a989fa2004fdd1170
Author: Ed Bradbury <ebrad005@gold.ac.uk>
Date: Tue Apr 13 16:23:50 2021 +0100

Just testing some session management things by logging session info each time a route is triggered

commit ff0d2e91f533eb1576a35cfc9dad24888eb06b
Author: Ed Bradbury <ebrad005@gold.ac.uk>
Date: Tue Apr 13 16:09:48 2021 +0100

No errors from Passport.js configuration (though the middleware is not yet implemented in any routes, so errors may still arise). Added some explanatory comments in src/app.js, config/database.js & config/passport.js

commit e977be3fb60469bcd384d024b2819254c7746681
Author: Ed Bradbury <ebrad005@gold.ac.uk>
Date: Tue Apr 13 15:54:04 2021 +0100

Configured Passport.js library in config/passport & imported configuration in src/app.js

commit 8413c2bc312c2866075de3faa44836c47c1d821c
Author: Ed Bradbury <ebrad005@gold.ac.uk>
Date: Tue Apr 13 13:26:48 2021 +0100

Testing that database operations still function as expected after moving db configuration code from app.js to dedicated database.js file in src/config directory

commit 2e952d5578fc253f543d444e6b9c23538218158b
Author: Ed Bradbury <ebrad005@gold.ac.uk>
Date: Tue Apr 13 12:16:29 2021 +0100

test using express' built in body parser & json parser rather than the npm body parser module (deprecated)

Still figuring out cookies

commit dab746a51cbd885a7839df7e71c92f3af3249bae
Author: Ed Bradbury <ebrad005@gold.ac.uk>
Date: Mon Apr 12 13:24:13 2021 +0100

Added app.set('trust proxy', 1) on line 22 in an attempt to fix session cookie persistence

commit 33cd8f564065efdedd7fa6b0fca73f326b2cb0f0
Author: Ed Bradbury <ebrad005@gold.ac.uk>
Date: Mon Apr 12 12:06:44 2021 +0100

Added 'proxy: true' to Express session config (line 73) in an attempt to allow session management cookies to be set (Heroku servers redirect incoming HTTPS requests to apps through HTTP)

commit 08e6f363b53f6e84632a35abcc16c94c2dccc803
Author: Ed Bradbury <ebrad005@gold.ac.uk>
